

What is TEC?

The Bay Area Trauma Education Consortium (TEC) was founded in 1986. The group consists of trauma program managers, nursing educators and clinical nurse specialists from the eight San Francisco Bay Area Trauma Centers. The goal of the consortium is to provide affordable, quality trauma education through the sharing of resources and the consolidation of efforts.

Course Overview

The challenges of providing quality trauma care continue. Trauma providers are expected to have advanced knowledge and skills in diagnosis, treatment, and on-going management. The goal of Totally Trauma By The Sea is to present the most current clinical information available about the care of the injured patient. To meet this goal, we have assembled an outstanding faculty, all of whom are on the front line of providing trauma care. This dynamic conference will address cutting edge trauma care issues.

Provider approved by the California Board of Registered Nursing. Provider Number CEP 9916, for twelve contact hours.

This course has been approved for twelve hours of Category 1 EMT-P Continuing Education by California EMT-P CE Provider 43-9001

Objectives:

At the conclusion of this program the participants will be able to:

1. Discuss the current treatment trends, research, and complications related to trauma, including Advanced Trauma Life Support (ATLS) recommendations, fluid resuscitation, brain injury and the neuro exam, pain management, pelvic fractures, and trauma induced sepsis in adult and pediatric populations.
2. Discuss the history of trauma, injury prevention strategies, and current legislation related to trauma.
3. Identify key points learned from cases in trauma and potential missed injuries and how these impact your practice.
